

TERESA – Types of interaction between Environment, Rural Economy, Society and Agriculture in European regions

Period of performance: 2007-2009

TERESA is a rural development research project co-funded under the 6th Framework Programme for Research and Technological Development and conducted by 12 research institutions from all over Europe. Based upon the general deficit of agricultural and regional policy not being able to picture the interactions and interdependencies between agriculture and the rest of the rural economy in all its complexity, the main objective of this project was to shed light on these patterns of integration of agricultural structures in different regional contexts.

Agriculture in the context of multifunctionality and sustainable rural development, Source: adapted from Cairol et al. 2006

Project team: Erich Dallhammer, Sebastian Beiglböck, Alexandre Collon, Ursula Mollay, Tobias Panwinkler, Bernd Schuh

Partners: ÖIR performed as the lead partner along with 11 international partners

Financed by: European Commission, Directorate-General for Research and Innovation, 6th Framework Programme
