

## TIA workshop “Milk quotas” and training session

Period of performance: 2014

In November 2014, ÖIR held a workshop on the subject of the smooth phasing out of the milk quotas in the European Union. A number of experts in the field of dairy industry has discussed the phasing out of the milk quotas in April 2015 and identified possible territorial effects of these arrangements. Based on the ESPON TIA Tool, developed by ÖIR in 2014, a conceptual model of the effects of expiring quotas on the aspects of environment, society, economy and administration has been elaborated. In a further step, the possible effects have been presented in cartographic form.

Conceptual Model, Source: TIA Workshop, CoR, 27 November 2014

In addition to the workshop, an intensive training session with employees of the Committee of the Regions in handling the ESPON TIA Tool was held.

Project team: Bernd Schuh; Stephanie Essig

Client: Ministry of the Interior of the Grand Duchy of Luxembourg, ESPON Coordination Unit
