

Just Transition Plan Austria 2021-2027: Case Studies to assess the effects by the transition processes towards a climate neutral economy

Period of performance: 2021-2022

The study examined the impacts and needs of businesses in light of the upcoming transition to a climate-neutral economy. The business sector plays a crucial role in achieving climate neutrality in the next 20 years. For the preparation of the JTP 2021-2027 for Austria, case studies are conducted.

Cement factory, © ÖIR GmbH

ÖIR conducted case studies in CO₂-intensive sectors as well as the forerunners of the transition in Austria. The focus was on the challenges and opportunities for companies arising from the transition to climate neutrality, as well as the effects on competitiveness and employment. The regional focus was on the Austrian JTP region consisting of specific areas in four provinces – Carinthia, Lower Austria, Upper Austria, Styria.
